## GENERAL DISCUSSION

The schools opened last fall with enrolments as follows: Mrs. Mulhall's room, 21; Miss Balch's room, 21; Mrs. Murdough's room, 35; Miss Cuddihy's room, 36; High school, 61; North Branch, 8; Center, 14; making a total of 196.

One of the tests of the success of public education is the number of boys and girls whom we succeed in retaining to the end of the high school, and have taken advantage of the opportunities which the tax payers make available. Judging from the entire high school enrolment, the number of graduates, and the size of the town, there is considerable room for improvement.

When all is said and done we educate boys and girls to take their places in life as worthy and productive citizens. This is the reason why cultural education is being rapidly supplemented with vocational training. The capacity to earn a living is one of the primary duties of life. In compliance with this philosophy the secondary school at the present time, in numerous communities, furnishes courses in Home Making, Mechanic arts, Commerce, foreign languages, Chemistry, Physics, Biology, social science, as well as advanced training in the fundamentals. The

time is now ripe in Antrim to begin to think about the addition of Home Economics for the girls, and Mechanic arts for the boys, to our present curriculum.

This year the high school offering has been decidedly enriched by the addition of a fine commercial course. With a little reorganization of the school we are furnishing a most desirable type of vocational education to a substantial number of boys and girls intensely interested in this type of work. Our curriculum has been further enriched by the addition of a fine course in Biology, which we teach in order to establish a foundation to build upon for boys and girls who contemplate scientific occupations such as nursing, medicine, and sanitary biology. All of this is being accomplished without having eliminated any of the courses previously taught, and without any increase of the teaching staff.

One of the cardinal principles of education is an opportunity for boys and girls to learn and cultivate the worthy use of leisure time. It is better to spend money to teach young people the proper use of their time than to spend money to make them "serve time." Provision should be made for worthwhile opportunities, according to the present day interests of boys and girls, in social, physical and athletic activities.

I also suggest for consideration the employment of a part time school nurse to cooperate with the school physician in making our health work more effective.

Miss Edith Messer, our art supervisor for many years, resigned her position early in the year because of ill health. We are glad to report that her condition has improved since. We rejoice with Miss Messer in the influence which she had had on the community. She has taught us invaluable skills, and an appreciation and enjoyment of the beautiful, thus enriching our lives.

Due to Miss Messer's able training of the teachers as well as the children, our teachers have carried on her work in a most creditable manner. It would be an excellent idea if at the next meeting of the supervisory union the school board of Antrim could persuade several of the other towns to join with Antrim in sharing the expense

of engaging another art supervisor to succeed Miss Messer.

When the reader focuses his critical eye on that which has been said let him remember that after all it has been done for the best physical, moral, and intellectual interest of his children.

Respectfully submitted,

VINCENT GATTO,

Supt. of Schools.

Hillsboro, N. H., February 1, 1938.
